**Richards Elected Vice-Chairman**  
At the tri-ennial meeting of the general committee of adjustment of the B. of L. E. of the Union Pacific system, held at Omaha last week, W. L. Richards, of this city, was elected vice-chairman. This makes Mr. Richards second in authority on B. of L. E. matters on the entire Union Pacific system, which, considering he is among the younger engineers, is conferring considerable honor upon him.

**Train Service Interrupted.**  
A very heavy rain fell Friday night along the Union Pacific from Gothenburg to Kearney and at Elm Creek quite a stretch of track was washed out. West bound trains were held there for four hours and then passing over only got as far as Darr when another washout was encountered, causing another delay of four hours. Train No. 13, due here at 7 a. m., did not arrive until 4 in the afternoon. Sunday another washout occurred at Elm Creek, delaying trains about three hours.

A new coast train over the Union Pacific was placed in service Sunday. Going west it will run as second section of train No. 19, and will arrive at this terminal about nine o'clock in the morning. Going east it will run as second section of train No. 6 and will carry largely extra equipment and express stuff in carload lots. It has resulted in adding four engine crews and two train crews out of North Platte.

**Bullet Stopping Tricks.**  
Five feet of clay, three feet of loose earth, or two and a half feet of sand will stop a modern rifle bullet at the closest range; but, curiously enough, as the layman may think, ramming earth hard reduces its resisting power, and high velocity bullets have less penetration in sand at short than at medium range. Eighteen inches of sand between boards is bullet proof, also nine inches of well built brick work. Soft wood, like fir, across the grain is bullet proof at point blank range if forty-eight inches thick, or at 500 yards if half as thick. Similarly, twenty-seven inches of hard wood, like oak, is point blank proof, or fifteen inches at 500 yards. Half an inch of wrought iron or mild steel, a quarter of an inch of hard steel, or a fifth of an inch of special steel is bullet proof. So are six inches of shingle, fifteen inches of coal, or, as some people may be surprised to know, eight feet of snow.—London Express.

Fred Bremer went to Sioux City Friday to accompany Mrs. Bremer home.

Mr. and Mrs. Frank Dickerson, of Hershey, were visitors in town yesterday.
